VII. Open calls and applications	4

I. International Young Scientists Program

The International Young Scientists Program was established by the Ministry of Science and Technology of China in 2013 as an important mechanism to promote scientific and cultural exchanges between young scientists from China and abroad. Its main aim is to assist developing countries in enhancing their scientific and technological capacities, to foster young scientific leaders through cooperation, and to promote practical international scientific cooperation.

The Program provides funding for eligible outstanding international young scientists, scholars, and researchers to conduct work exchanges in China, with the aim of enhancing the scientific and technological capacity of partner countries, boosting innovation capabilities, promoting scientific and cultural exchanges between China and the world, and providing a quality platform for young scientists to learn from each other. The Program also seeks to build long-term and stable scientific cooperation partnerships.

This program provides subsidy (Euro 2544 per month) for scientists who would like to carry out joint research in China. Chongqing University is willing to be the host organization. The Program's project implementation period is divided into three categories based on the duration of the International Young Scientists' work in China: 3 months, 6 months, and 12 months. You might find here the website of [Chongqing University](https://www.cqu.edu.cn), applications for any fields within their capabilities are welcome.

Given the tight timeline, young scientists are encouraged to send the organisers a brief description of the job positions they are interested in (including a few sentences outlining the position and responsibilities) along with their CVs as soon as possible. They can send these materials directly to us at junrc@cqu.edu.cn.

Application deadline is **16 September 2024**. You can find more information about the call in the **attachment**.

II. Societal Readiness Level and exploring opportunities in social innovation

The Lithuanian RDI Liaison Office in Brussels (LINO), the NCBR Office in Brussels – Business & Science Poland, the Slovenian Business & Research Association, Eötvös Loránd University, Corvinus University of Budapest and the National Research, Development, and Innovation Office in Hungary organise a series of virtual events focusing on social aspects of research and innovation.

The first event will concentrate on Societal Readiness (SR) model proposed by the European Commission. Since 2014, the Technology Readiness Level (TRL) scale has been incorporated into the EU Horizon 2020 Work Programmes and widely adopted in many European countries and regions in the context of Research, Development, and Innovation investments supported by the ERDF (European Regional Development Fund). The Societal Readiness approach aims, when integrated into R&I processes, to improve the consideration of different societal needs and concerns and to respond to them, thereby increasing the potential for societal uptake. The Commission is proposing to introduce the Societal Readiness (SR) model for Cluster 5 of the Horizon Europe Programme in its upcoming 2025 Work Programme.

Place: **Online**

Date: **25 September 2024, 14:00 CET**

The second event will delve into the social economy, specifically focusing on social innovation. Social innovations are new ideas that meet social needs, create social relationships and form new collaborations. These innovations can manifest as products, services or models addressing unmet needs more effectively. The goal of this event is to comprehend the phenomenon and added value of social innovation and how the Commission is promoting the market uptake of these innovation. During this event, you participants have the opportunity to hear from the Commission and gain insights from the speakers coming from the organising Member States regarding their work in the field of social economy and social innovation.

Place: **Online**

Date: **26 September 2024, 14:00 CET**

You can read more about both events, and register [Here](#).

III. Budget, design, and manage your projects together with all partners – Live Demo by EMDESK

For over a decade, EMDESK is a leading provider of project and work management solutions for research and innovation projects proudly supporting thousands of projects, from small ones to billion Euro projects involving 150+ organisations. EMDESK provides real-time visibility of project progress, finances, and deadlines using the latest data, efficient tracking of time and expenses for precise and simplified financial reporting, monitoring of all activities, milestones, deliverables, team members, and partners, etc.

The following live demo is to discover EMDESK in detail and learn how the project and financial management platform can support you in managing single or multiple projects, all while maintaining maximum control with the highest security standards.

Date: **26 September 2024., 11:00-11:30 CET**

Place: **Online**

For registration, please click [Here](#).

IV. ICGEB - Meetings and Courses Call for Proposals

ICGEB provides support for the organisation of scientific events in the Life Sciences in ICGEB Member States. Funding is available for Meetings, to be held in the three ICGEB Components (Trieste, Italy; New Delhi, India; Cape Town, South Africa); Theoretical and Practical events to be co-sponsored by local organising institutions; "Seeds for Science" supports small meetings aimed at building networks for future research collaborations. Sponsorship is also provided to scientific events relevant to the ICGEB mandate in the ICGEB Member States. Maximum contribution to be requested may differ based on the chosen category.

Application deadline: **8 October 2024**

For more information about the call, please click [Here](#).

V. Berlin Science Week

With over 180 participating organisations and more than 600 involved scientists, artists, politicians, and other inspiring initiators, Berlin Science Week captivates a diverse audience of over 30,000 participants. With more than 200 events spanning diverse locations in the city - from universities and lecture halls to bars, museums, and cinemas - organisers bring science to life in unexpected ways. This year, the two central festival hubs CAMPUS & FORUM are organised under the theme COMMON GROUND. The former, housed within the iconic Museum für Naturkunde Berlin, provides venue to engage in insightful workshops, join lively discussions, explore thought-provoking exhibitions, and dive deep into the heart of scientific exploration. The latter organised at Holzmarkt 25, will provide a platform where artists and scientists unite during the festival days.

Place: **Hybrid (Onsite venue: Berlin, Germany)**

Date: **1-10 November 2024**

For more information about the event, click [Here](#).

VI. Other upcoming calls and events

- **ISC project updates: Converging science & technology in a digital era**

The ISC secretariat invites ISC Members to a Zoom meeting that will provide updates on the ISC's contributions to digital sustainability, our work in supporting Member organizations with their digital transformations, CODATA's WorldFAIR project, and our work around the impacts of artificial intelligence on science systems.

Date:

Session 1: **18 September 2024, 7:00-8:30 am UTC**

Session 2: **19 September 2024, 15:00-16:30 UTC**

Place: **Online**

You can register [Here](#).

- **Horizon Implementation Day: Finding opportunities and submitting a proposal in Horizon Europe**

Időpont: **2024. szeptember 26. (9:30-12:30, CET)**

Helyszín: **online**

További információkért kattintsanak [Ide](#).

- **Horizon Implementation Day: Grant Agreement Preparation in Horizon Europe**

Időpont: **2024. október 16. (9:30-12:45, CET)**

Helyszín: **online**

További információkért kattintsanak [Ide](#).

- **Horizon Europe Horizon Implementation Day: Grant Management in Horizon Europe**

Időpont: **2024. november 5. (9:30-12:30, CET)**

Helyszín: **online**
