**I. Deadline Extended: Submit your abstract for the EARMA Conference Utrecht 2026 by September 19**

EARMA is pleased to announce that the deadline for abstract submission for the EARMA Conference Utrecht 2026 has been extended by one week. The new submission deadline is Friday, September 19, 2025.

By submitting your abstract, you can:

- Share your expertise with an international audience of research managers and administrators.
- Highlight innovative practices and solutions that support excellence in research management.
- Contribute to the community by addressing current challenges and future directions for our profession.
- Gain visibility for your work and showcase your institution's engagement in advancing research management.

The EARMA Annual Conference is the largest gathering of research managers and administrators in Europe, attracting professionals from across the globe. Your contribution will help shape a diverse, thought-provoking and practical programme for all participants.

Submission deadline: **19 September 2025**

You may submit your abstract [Here](#).

## II. Global Ocean Oxygen Network's webinar on ocean deoxygenation

Join the Global Ocean Oxygen Network (IOC Expert Working Group GO2NE) for the latest session of its webinar series on ocean deoxygenation.

The webinar will feature presentations by two ocean oxygen scientists, one early career and one mid-late career scientist, followed by moderated discussion sessions. Speakers will discuss the latest globally relevant ocean oxygen research in the context of their fields of research and expertise. The series is moderated by GO2NE working group members and guest experts.

Date: **23 September 2025, 16:00 CEST**

Venue: **Online**

You may register [Here](#).

## III. The 9th edition NTNU European Conference

In a rapidly changing world, with increasing pressure on the sustainable prosperity and competitiveness of Europe, the arrival of a new European Commission ushers in an evolved set of political guidelines for shaping the continued prosperity of the European Union's strength and unity in the years ahead. Community & democratic values, security, and resilience are key components in the new plan presented by President of the European Commission Ursula von der Leyen in 2024. Investment, efficient implementation, and impactful measures are needed to ensure the perpetuation of Europe's social model and market economy in a continually shifting geo- political and economic world.

In this 9th edition of the NTNU European Conference we focus our attention on the challenges and opportunities ahead. We explore how the evolution of the guidelines and priorities set out by the commission together with the potential of technology as a facilitating tool can shape the future for European civil society and competitiveness on the global stage. More specifically, we explore this within the strategic thematic areas: Civil security, Communities, and Ocean & Coast.

The Norwegian University of Science and Technology (NTNU) European Conference is an event introduced in the Brussels Arena in 2016. It aims to facilitate discussions on R&I and Education policies and strategies between stakeholders.

Date: **24 September 2025**

Venue: **In-person event in Brussels with streaming**

You may read more about the event [Here](#).

## IV. ERC Grants: what to expect in 2026 calls

The ERC has introduced some novelties in the 2026 Work Programme. This info session is designed to help applicants understand how these changes will apply to the submission of applications and evaluation of proposals, ensuring they are well-prepared for the upcoming calls for the Starting, Consolidator and Advanced Grants.

Participants will receive practical guidance on the application process with a focus on:

- the new proposal structure,
- the updated rules for the extension of the eligibility period,
- the additional relocation funding,
- the new resubmission restrictions.

While the session is open to researchers based in EU Member States and Horizon Europe Associated Countries, the ERC encourages those in Widening countries to attend, in line with the efforts to increase success rates in countries hosting few ERC grantees.

Date: **24 September 2025, 9:30 – 11:30 CEST**

Venue: **Online**

You may read more information about the event [Here](#).

## **V. Launch event: A practical digital toolkit for science organizations**

Join for this one-hour session designed to equip science organizations with practical, ready-to-use tools and strengthen their digital capacities.

Completed earlier this year, the ISC Digital Journeys project supported eleven ISC Members in harnessing digital technologies and new ways of working to advance their missions. The project produced a range of practical tools, with a particular focus on organizations with a footprint in low- and middle-income countries (LMICs), but which are relevant to all science organizations.

Whether you're looking to engage new audiences, improve internal systems or simply find out where to start, you'll leave with ready-to-use resources relevant to you and your organization.

Date: **25 September 2025, 12:00 – 14:00 UTC**

Venue: **Online (Zoom)**

You may read more about the event [Here](#).

## **VI. TECNALIA - H2SITE Success Story: Enabling Hydrogen Generation & Transportation for a Sustainable Future**

The European Association of Research and Technology Organisations (EARTO) is pleased to invite you to the first webinar of its new series on "*The role of RTOs and collaborative research for EU technological advancement*", taking place on 29 September 2025 at 13.00-14.00 (CET). TECNALIA – H2SITE Success Story showcases the successful collaboration between EARTO member TECNALIA and Eindhoven University of Technology in the field of hydrogen generation and transportation, which led to the creation of the spin-off H2SITE. In line with the recent launch of the EARTO webpage dedicated to RTOs' success stories, we are proud to present this success story with the participation of two distinguished speakers:

- Asier Rufino, Founder and Managing Director of Tecnalia Ventures, Tecnalia
- Andres Galnares, CEO, H2SITE

The platform of the webinar is Microsoft Teams. Please note that the connection link will be sent to the registered participants few days prior to the webinar.

Date: **29 September 2025, 13.00-14.00 (CET)**

Venue: **Online**

You may register [Here](#).

## VII. Lem Prize 2025

The Lem Prize has been established to commemorate the 100th birthday of the great Polish visionary and science fiction novelist, Stanisław Lem, awarded doctorate honoris causa of Wrocław Tech in 1981. The Prize is awarded annually to one young researcher whose creative work in science or engineering has potential for positive impact on the future of civilization increasingly filled with technology.

The Wrocław University of Science and Technology (Wrocław Tech) has announced a new call for applications – edition 2025. Applications should be submitted by 30 September 2025 to [lemprize@pwr.edu.pl](mailto:lemprize@pwr.edu.pl).

Applications may be submitted by scientists who:

- is 40 or younger in 2025,
- is affiliated with an academic or research institution in a European Union member state, in an associated country participating in Horizon Europe, or in Switzerland,
- has made in the last 3 full calendar years (from 1 January 2022 until the submission date) a discovery or significant achievement in broadly understood fields of science and engineering.

The winner will receive a cash prize of PLN 100,000 (approximately EUR 23,000) and will be invited to Wrocław for the Lem Prize award ceremony which will be held in 2026. The winner will also be expected to give a lecture about her/his discovery or achievement.

Deadline: **30 September 2025**

## VIII. Long Covid: Current Realities, Future Directions

Since the beginning of the COVID-19 pandemic, an estimated 400 million people worldwide have been affected by post-COVID-19 condition (PCC), also known as Long Covid. According to the WHO, around 6 in every 100 people infected with COVID-19 develop Long Covid, a condition that typically begins within three months of the initial illness, lasts for at least two months, and is marked by debilitating symptoms ranging from mild to severe, sometimes leading to long-term disability.

This workshop builds on the outcomes of a previous EPRS event that examined the then-emerging understanding of Long Covid--its clinical profile, its impact on patients and society, and the urgent actions needed to address gaps in knowledge, raise awareness, and advance treatment development.

By bringing together MEPs, researchers, policymakers, healthcare professionals, communicators, and patient advocates, the workshop seeks to foster a coordinated, multidisciplinary debate on Long Covid. Its goal is to share insights, challenges, and innovations, while informing both citizens and specialized audiences about scientific progress, policy developments, and practical experiences. Ultimately, it aims to contribute developing effective and long-term strategies for addressing Long Covid across Europe.

The event will be web streamed, and the link will be published on the event page.

Date: **30 September 2025**

Venue: **Web streamed**

You may find more information about the event [Here](#).

## IX. Open calls and applications

Az alábbiakban tájékoztatást adunk azon nyitott eseményekről és pályázatokról, melyek az előző hírlevelekben megjelentek.
