I. EDI in Practice: Launching SAPEA's Strategy and Sharing Lessons from European Academies

This webinar will introduce SAPEA's Strategy on Equality, Diversity and Inclusion (EDI). With this Strategy, SAPEA renews its commitments to ensuring that EDI is not a peripheral consideration but systematically embedded across all aspects of its scientific advisory work - from expert nomination and selection to evidence synthesis, deliberation, communications and outreach.

Embedding EDI principles is essential for delivering high-quality, robust, and relevant science advice. By promoting diversity across disciplines, career stages, geography, and perspectives, including experts beyond Academy Fellows, SAPEA seeks to reduce bias and strengthen the relevance and legitimacy of its advice.

The webinar also provides an opportunity to raise awareness and support knowledge exchange on EDI practice in academia, through examples of EDI strategy implementation in European Academies, with the aim of sharing good practice and inspiring action towards more inclusive science advice.

This webinar is aimed at SAPEA Academy Networks representatives, Academy Presidents, and interested members and staff.

Objectives of the workshop:

- Present the SAPEA's Strategy on EDI and its five strategic objectives,
- Raise awareness and support knowledge exchange and good practice on EDI in academia,
- Strengthen alignment between SAPEA, Academy Networks and European Academies.

Date: 5 October 2026

Venue: Online

You may read more about the event [Here](#).

II. STOA workshop: Rethinking intellectual property in the era of open science and AI

Open Science supports innovation via a transparent dissemination of knowledge and has taken roots as one of the key principles in science communication in Europe. Intellectual property protection tools aim at rewarding and incentivising innovation, too, but through means that may seem contrasting to Open Science values. The need to find synergies in applying both incentives is well-established and sought for, while the fast-evolving use of generative AI adds further challenges to those efforts.

The STOA workshop will gather insights from policy makers, researchers and users to identify innovative, flexible and cooperative solutions within the existing intellectual property frameworks, as well as the possible needs for policy changes that help valorise European research and support sovereign and inclusive innovation in the EU.

The event will be webstreamed.

Date: 13 October 2026

Venue: Online

You may register [Here](#).

III. Booster Info Session: free guidance for EU-funded research results

The European Commission Directorate-General for Research and Innovation is organising an info session to present Booster's services available within the EU Innovation Platform.

Booster offers free-of-charge services to support EU-funded projects in their journey from results to impact. Join the info session dedicated to Booster for a global overview of what the set of services includes, more information about the expert guidance that can be expected, how services are delivered, and also real-world experiences shared by a Booster beneficiary and their Booster expert.

The session will also include an introduction to the EU Innovation Platform and a live Q&A, allowing participants the opportunity to ask their most pressing questions to Booster Framework Coordinator, Alessia Melasecche Germini.

Date: 21 October 2026

Venue: Online

You may register [Here](#).

IV. From Data to Decisions: Transforming Research Office Workflows with Web of Science Research Intelligence

Research Offices are under increasing pressure to deliver strategic insights while navigating fragmented information, growing reporting requirements, and an increasingly complex research landscape. While AI is becoming commonplace, the real challenge is transforming trusted research data into actionable intelligence that supports faster, evidence-based decisions.

In this webinar organized by Clarivate, we'll explore how Web of Science Research Intelligence helps Research Offices streamline recurring workflows such as institutional benchmarking, identifying emerging research strengths, discovering funding opportunities, finding experts, and supporting strategic planning. Through real-world examples and a live demonstration, we'll show how trusted data can be transformed into decision-ready insights that save valuable time and enable better institutional decisions.

The session will include:

- Real-world Research Office workflows and practical use cases.
- Examples of how institutions are using research intelligence to support decision-making.
- A live demonstration of Web of Science Research Intelligence.
- A customer perspective from the University of Wrocław.
- Interactive Q&A with our speakers and product experts

The event is open to both EARMA members and non-members. The event is free of charge, but registration is required to attend the webinar. Registration will remain open until 27 October.

Date: 28 October 2026

Venue: Online
