

HETI NEMZETKÖZI TÁJÉKOZTATÓ HÍRLEVÉL

*nemzetközi együttműködési lehetőségek,
konferenciák és webináriumok vonatkozásában*

2026. szeptember 25.

TARTALOM

I. Meghívó a 7. Földcsuszamlás Világforumra (2026. november 23-27.)	1
II. Setting the standard: accelerating market uptake	2
III. STOA workshop: Phage therapy as a tool against antimicrobial resistance	2
IV. Central European Technology Forum – CETEF'26 - manage the future: high technologies for europe's security	3
V. Hyperion OPEN Course on Framework 10 presented by Dr. Seán McCarthy	4
VI. Open calls and applications	5

I. Meghívó a 7. Földcsuszamlás Világforumra (2026. november 23-27.)

Az Amrita Vishwa Vidyapeetham felsőoktatási intézmény ad otthont a 7. Földcsuszamlás Világforumnak (7th World Landslide Forum – WLF7) 2026. november 23-27. között az egyetem Faridabad városi campusán (Haryana állam). Az eseményt a Földcsuszamlások Nemzetközi Konzorciuma (ICL) szervezi az Egyesült Nemzetek Szervezetével és annak szakosított intézményeivel együttműködve. Az esemény tudósokat, kutatókat, döntéshozókat és hallgatókat hoz össze, hogy előmozdítsák a földcsuszamlás-tudomány, a katasztrófakockázat-csökkentés terén végzett munkát.

A szervezők várják az egyetemek és felsőoktatási intézmények részvételét – különösen azokét, amelyek a földtudományok, az építő- és környezetmérnöki szakok, a katasztrófakezelés, az éghajlati rugalmasság és a fenntarthatóság területén tevékenykednek. A hallgatók és a fiatal kutatók számára 200 USD + GST összegű kedvezményes regisztrációs díj áll rendelkezésre a jelenlegi „Early Bird” tarifa keretében, amely 2026. szeptember 30-ig érvényes, valamint korlátozott számú hallgatói ösztöndíj a jogosult diákok számára, amely fedezi a regisztráció költségeit.

A résztvevők előadásokat tarthatnak, panelbeszélgetésekben és a plenáris ülésekben vehetnek részt, valamint bemutathatják kutatásaikat tanulmányok és absztraktok benyújtásával, PhD-fórumokon, poszterszekciókon és egy fotópályázaton keresztül.

Időpont: 2026. november 23-27.

Helyszín: Faridabad, Haryana állam, India

Az eseményről részletesen a [Linken](#) olvashatnak.

II. Setting the standard: accelerating market uptake

Standards are an invisible, but fundamental part of our daily life. They are essential for breakthrough innovation: from Wi-Fi frequencies to connected devices, from data interoperability to cutting-edge AI systems, from advanced materials to safe and sustainable buildings. Standards create trust, enable interconnectivity and promote safety.

Standards foster value creation from research and innovation in two ways: solid research data and results drive new standardisation activities, while established standards can help research and innovations advance towards market uptake.

Join us in this talk to explore how standards can play a key role in bringing new solutions to market and scaling them up. Our speakers will share their experiences on collaboration between industry, academia and standardisation organisations that support faster market uptake and scaling of innovations.

Date: 29 September 2026

III. STOA workshop: Phage therapy as a tool against antimicrobial resistance

The Antimicrobial resistance (AMR) – occurring when bacteria, viruses, fungi and parasites stop responding to the antimicrobial medicines designed to treat them, making infections difficult or impossible to cure - poses a growing threat to global health security, with an estimated 8.22 million deaths predicted to be associated with bacterial AMR globally in 2050 (WHO Regional Office for the Eastern Mediterranean, 2025).

Situation of armed conflicts are today recognised as significant accelerators of AMR. Documented experience from conflicts in Iraq, Syria, Afghanistan, and Ukraine has shown alarmingly high rates of multidrug-resistant (MDR) organisms colonizing war wounds, complicating treatments and creating ideal conditions for complex, polymicrobial infections. Furthermore, disruption of the healthcare system, disrupted supply chains, population displacement, and poor infection control may contribute to the spread of MDR pathogens from soldiers to civilians in war zones.

Bacteriophages, or phages, are viruses that specifically infect and kill bacteria and represent a promising tool against multidrug-resistant infections. While robust evidence from randomized controlled trials is still limited, successful use in selected individual cases demonstrates their therapeutic potential.

This STOA workshop aims to advance phage therapy as a viable, evidence-based strategy for tackling antimicrobial resistance (AMR), with particular attention to the regulatory, clinical, and practical hurdles still standing in its way. Bringing together leading experts in the field, the meeting will offer a perspective on the broader AMR landscape, setting the scale and urgency of the problem across Europe, to then provide a comprehensive view of the scientific and clinical progress on bacteriophage therapy, including its application to multidrug-resistant infections arising from war-related injuries. Contributions from regulatory and standardization experts would help analyse the current lack of a harmonized legal and regulatory framework for the development, testing, and clinical use of phage therapy.

Together, these perspectives would provide a realistic picture of where phage therapy stands today, and what is needed to allow its routine clinical use.

No registration is required to watch it online. The streaming link will be published one or two days before the event.

Date: 30 September 2026

Venue: Online

IV. Central European Technology Forum – CETEF'26 - manage the future: high technologies for europe's security

It is our great pleasure to invite you to the 5th Central European Technology Forum – CETEF'26. This prestigious event will be held on 19-20 October 2026 at the Poznan University of Technology in Poland.

CETEF is a key international undertaking organized since 2014 by the Polish Chamber of Commerce for High Technology (IZTECH) and the NOT Polish Federation of Engineering Associations. The Forum is held under the patronage of the European Parliament and the auspices of the European Commission, in cooperation with leading research institutes and universities, including the Poznan University of Technology and the EUNICE European University. The event is further supported by the City of Poznań, which serves as the host for this prestigious gathering.

As an international platform, CETEF'26 will gather over 1000 representatives from the technology, academic, industry, and governmental sectors. The forum aims to:

- Discuss the development of technical fields decisive for ensuring Technological Sovereignty and security for Europe.
- Explore new ideas and build partnerships to shape the new EU Framework Program.
- Present the technological potential of Poland and Central Europe in implementing large-scale high-tech projects.
- Enhance the strategic role of Central and Eastern European countries in the technology sector.

The two-day program is designed to facilitate high-level networking and knowledge exchange.

Date: 19-20 October 2026

Venue: Poznań, Poland

V. Hyperion OPEN Course on Framework 10 presented by Dr. Seán McCarthy

The two 45-minute workshops are designed to help research groups plan for the next European Research programme. The formal name of the programme will be Horizon Europe (2028-2034). To avoid confusion with the existing Horizon Europe programme, these workshops refer to the next programme as 'Framework 10'.

Workshop 1 is designed to monitor the evolution of Framework 10 and to help prepare Researchers and Support Staff for 2028.

Workshop 2 identifies the 'Expert Groups' consulted in the preparation of Framework 10. This information is important in understanding the Evaluation Criteria of the different programmes in Framework 10. Expert Groups are also an important source of ideas for future proposals and in identifying strategic partners for proposals.

Target Audience: People from Universities and Research Centres who are responsible for planning for Framework 10.

Date: 21 October 2026

Venue: Online
