The "Wigner 111 – Colourful & Deep" Scientific Symposium is organized on the occasion of Eugene P. Wigner's 111<sup>th</sup> birthday, the 50<sup>th</sup> anniversary of his receiving the Nobel Prize in Physics, and to celebrate the recent foundation of the Wigner Research Centre for Physics of the Hungarian Academy of Sciences. There will be plenary talks, invited talks, and a poster session. According to the very broad spectrum of Eugene P. Wigner's contribution to physics, the program will include subjects like foundations of physics, Wigner functions, group theory, quantum optics, solid state physics, particle and nuclear physics, astrophysics, energetics, nuclear reactors. This series of talks, to be presented by leading experts, will surely reflect the present state of art of modern physics in these sub-disciplines. After the symposium, on 14<sup>th</sup> November, in the frame of the Wigner memorial tour, a visit to Wigner's birth-place, to his famous Budapest-Fasori Lutheran Secondary School and to the Wigner Research Centre for Physics will be organized, including the pre-inauguration of the Wigner square and a visit to the Wigner Datacenter.
